## SH 130 Segment 4 Sequencing

---

Lone Star Infrastructure (LSI) has created the following outline to help emergency responders and city, county and school representatives understand what to expect in the near future with regard to SH 130 construction and detours.

### **Elroy Road Detour**

- The Elroy Road detour is currently underway.
- Depending on the county's progress on adjacent road construction, Elroy, from F.M. 973 to Moores Crossing, is projected to open in February 2008.\*

### **Maha Loop Road Detour**

- Beginning Wednesday, January 2, 2008\*, LSI will implement the Maha Loop detour.
- The detour is expected to be in effect for approximately five weeks.

### **Pearce Lane Construction**

- Continuing through January and February reconstruction will be ongoing to upgrade Pearce Lane within the alignment of SH 130 which will require intermittent lane closures.

### **Evelyn Road Detour**

- Following the Maha Loop's opening, LSI will then begin work on US183 and Evelyn Road. This will require the detour of Evelyn Road.

### **Von Quintus Detour**

- This detour will be implemented when either Moore Road or Maha Loop Road opens, whichever comes first.
- Estimated time to commence this detour is in February.

### **Moore Road Opening**

- The construction of Moore Road is ongoing.
- Once Elroy Road construction is complete, Moore Road will undergo construction for opening in its final alignment.

### **McAngus Detour**

- McAngus will need to be detoured to complete tie in work for SH 130. This will transpire once Elroy construction is complete in February.

### **F.M. 812**

- Beginning January, construction will begin to widen and upgrade pavement on F.M. 812, requiring lane closures.

*\* Dates subject to change. Please refer to signage in the area and use always use caution when driving in and around a construction area.*
