NOTICE OF CLOSURE OF CR 107

After working with appropriate local and state officials, the following detour plan for the construction of the mainlanes of State Highway 130 at the current location of CR 107 was finalized.

Beginning January 4, 2005*:

- CR 118 will be reopened in its new configuration to CR 107.
- CR 107 will be closed permanently between the alignment boundaries of SH 130.
- CR 100 traffic (from FM 1660) will take CR 118 west, then north to CR 107 west of SH 130 construction.
- CR 100 traffic north of CR 107 will take CR 105 west to CR 110.
- Residents on CR 107, east of SH 130, will have access from CR 100.
- Once the Chandler Road Bridge (to be constructed by Lone Star Infrastructure) across SH 130 and the Chandler Road east extension (to be constructed by Williamson County) to CR 107 are completed CR 107 traffic will be able to use the bridge structure to cross the SH 130 alignment and tie back into CR 107. There is no timeframe available at this time for the completion of these two separate projects.

** NOTE: All dates approximate pending weather and utility relocations in the area.*
